ANNEX 6
CLASSIFICATION OF CROPS

The Indicative Crop Classification (ICC 1.1) developed in the WCA 2020 round has been revised for the 2030 round of agricultural censuses and is provided at the end of this annex as Version 1.2.

The ICC used in the 2020 agricultural census programme reflected various elements related to crops, including the growing cycle (temporary/permanent), crop genus or species (each crop can be described by its botanical name), and product type (provided in the structure of Central Product Classification Version 2.1).

The ICC has been revised based on the Central Product Classification Version 3 (UN, 2026b). CPC classifies goods and services into categories based on the nature of the product and its industry of origin. Crop products are classified mainly according to the type of crop. CPC itself is based on the Harmonized Commodity Description and Coding System (HS), a classification of the World Customs Organization. CPC is also broadly compatible with ISIC, in that the industry of origin is related to ISIC. The ICC is also consistent with the classification of commodities used in FAO's online database, FAOSTAT.

From a statistical point of view, the crop classification should be closely related to the product classification, and to some extent to the economic activity classification (ISIC). The crop classification refers to which crops are grown, whereas the product classification refers to the product(s) generated from that crop. Thus, "mustard" is an **oilseed crop**, whereas "mustard seed" is the oilseed product. There is not always a one-to-one correspondence between a crop and a product. The same crop may yield two products – for example, cotton may yield cotton fibre and cottonseed.

ICC Version 1.2 is based on the revised CPC Version 3, to which FAO has provided input. ICC Version 1.2 classifies crops into categories based on three main elements:

- **Product type.** The product type is provided in the structure of CPC, especially at the group and class level. Thus, under ICC Version 1.2, crops are first divided into groups such as **cereals**, **vegetables**, **fruits**, etc., and each group is further subdivided by crop type, such as **leafy/stem vegetables**, **fruit-bearing vegetables**, etc.
- **Crop genus or species.** At the lowest level of the classification, each crop can be described by its botanical name; thus, "Lentils" (class 7.05) is identified as the species *Lens culinaris*. However, it should be noted that ICC is not a botanical classification, as the groupings are based more on the agricultural use of the crop than the botanical similarities between crops. Thus, "**Oilseed crops** and **oleaginous fruits**" (group 4) is a grouping of crops of many different botanical types that produce the same type of product: oil.
- **Whether the crop is temporary or permanent.** CPC does not always permit a temporary/permanent division, because this is not important in a product classification. However, this distinction is fundamental to a crop classification. Because of this, some CPC classes are divided into temporary and permanent subclasses. In ICC Version 1.2, a separate code is provided to indicate whether the crop is temporary or permanent.

It should be noted as a general principle that in the ICC, a particular crop is classified only once in the classification, regardless of how the crop is used.

If a country wishes to separately identify the different uses of a crop – such as food or fodder, fresh or dried, fruit or oil, and industrial or non-industrial – it has two options:

- Further subdivide the crop in the crop classification, as required. Thus, subclass 2.02.04 could be subdivided into 2.02.04.01 (Pumpkin for food) and 2.02.04.02 (Pumpkin for fodder). If data on fodder crops are required from the agricultural census, the relevant fodder crop codes can be grouped.

- Include an item in the agricultural census on end use of the crop.

The following examples illustrate how to handle multiple-use crops in developing a crop classification based on ICC Version 1.2:

- All grain and vegetable crops should be assigned to groups 1 or 2, regardless of whether they are used for human consumption or as animal feed. Note that Class 9.01 (**Grasses** and **other fodder crops**) refers to crops that are solely fodder crops.
- The same principle applies to **sugar crops**. **Maize** should be designated as a **cereal crop** (Class 1.02), even if it is used as a **sugar crop**. Note that group 8 (Sugar crops) refers to **sugar beet**, **sugar cane** and **other specific sugar crops**.
- Crops such as **coconut** that are grown either as **fruit crops** or as **oil crops** should be classified according to their primary use in the country. In ICC Version 1.2, coconut has been shown as an **oil crop** (Subclass 4.04.01).
- Problems arise where the same physical crop is used for harvesting two products. The use of cotton to produce cottonseed and cotton fibre is one example. Such a crop should be shown only once in the harvested area data (harvested area relates to the area of the principal crop harvested – see paragraph 7.4.9), but could have a secondary use in production data. The crop should be classified according to its primary use in the country. For example, in ICC Version 1.2, cotton has been defined as a fibre crop (Order 9.02.01.01).

ICC provides only a broad-level structure for the classification of crops. For groups 1–8, ICC is consistent with CPC at the group level and generally consistent at the class level. At the subclass level, the two classifications are similar.

To help countries use ICC, an alphabetical list of crops with botanical names and crop codes is shown in Annex 7.

Note that the different levels of ICC – namely, groups, classes, subclasses and orders – do not relate in any way to the same terms used in the botanical taxonomic hierarchy.

As in the past, the crop classification needs to be adapted by countries to take account of national conditions. Not all crops are applicable to all countries, which may also wish to separately identify crops not shown in ICC or to show crops in more detail than is given in ICC. In particular, countries may wish to provide more detail for important national crops; for example, a rice-producing country may wish to show **rice** classified by variety, season or land type.

INDICATIVE CROP CLASSIFICATION VERSION 1.2 (ICC)

Group	Class	Sub class	Order	Descriptor	Crop type*

ANNEX 7
ALPHABETICAL LIST OF CROPS WITH BOTANICAL NAME AND CROP CODE (ICC AND CPC)

The main objective of this annex is to provide guidance to countries to identify crops and the links with the ICC and CPC 3.0.
ICC 1.1 code refers to the crop codes used in the WCA 2020.
ICC 1.2 code refers to the crop codes used in the current the WCA 2030.
CPC 3.0 code refers to corresponding codes in Central Product Classification (CPC) Version 3.0.

Crop name	Botanical name	ICC 1.1 Code	ICC 1.2 Code	CPC 3.0 Code
Abaca (Manila hemp)	*Musa textilis*	9.02.01.04	9.02.01.04	01929.07
Alfalfa for fodder or seed	*Medicago sativa*	9.01.01	9.01.01	01912*
Almond	*Prunus dulcis*	3.06.01	3.06.01	01371
Angelica stems	*Angelica archangelica*	6.02.02.90	6.02.02.90	01699*
Anise seeds	*Pimpinella anisum*	6.02.01.02	6.02.01.02	01654*
Apple	*Malus sylvestris*	3.05.01	3.05.01	01341
Apricot	*Prunus armeniaca*	3.05.02	3.05.02	01343
Areca (betel nut)	*Areca catechu*	3.06.08	3.06.08	01379.01
Arracacha	*Arracacia xanthorrhiza*	5.9	5.9	01599*
Arrowroot	*Maranta arundinacea*	5.9	5.9	01599*
Artichoke	*Cynara scolymus*	2.01.01	2.01.01	01216
Asparagus	*Asparagus officinalis*	2.01.02	2.01.02	01211
Avocado	*Persea americana*	3.01.01	3.01.01	01311
Bajra (Pearl millet)	*Pennisetum americanum*	1.08	1.08	01181*, 01182*
Bambara bean	*Voandzeia subterranea or Vigna subterranea*	7.09	7.09	01708
Banana	*Musa sapientum, M. cavendishii, M.nana*	3.01.02	3.01.02	01312.01, 01312.02
Barley	*Hordeum vulgare*	1.05	1.05	01151, 01152
Bay leaves	*Laurus nobilis*	6.02.02.90	6.02.02.90	01699*
Basil	*Ocimum basilicum*	9.03.01.02	9.03.01.02	01930.90*
Beans	*Phaseolus vulgaris*	7.01	7.01	01701*, 01241.01*,01241.90*
Beet, fodder (mangel) red, sugar, sugar for fodder, sugar for seeds	*Beta vulgaris*	8.01	2.03.90	01919.90* (fodder), 01259* (red), 01801 (sugar), 01803 (sugar for seeds)
Bergamot	*Citrus bergamia*	3.02.90	3.02.90	01329
Betel nut	*Areca catechu*	3.06.08	3.06.08	01379.01
Black pepper	*Piper nigrum*	6.02.02.01	6.02.02.01	01651
Blackberries of various species	*Rubus spp.*	3.04.90	3.04.90	01353.02*
Blueberry	*Vaccinium myrtillus; V. corymbosum*	3.04.06	3.04.06	01355.01
Brazil nut	*Bertholletia excelsa*	3.06.07	3.06.07	01377
Breadfruit	*Artocarpus altilis*	3.01.90	3.01.90	01319*
Broad bean,	*Vicia faba*	7.02	7.02	01702*, 01243*
Broccoli	*Brassica oleracea var. botrytis*	2.01.04	2.01.04	01213
Broomcorn millet	*Panicum miliaceum*	1.08	1.08	01181*, 01182*
Broom sorghum	*Sorghum bicolor*	1.04	1.04	01141*, 01142*, 01919.01*
Brussels sprouts	*Brassica oleracea var. gemmifera*	2.01.90	2.01.90	01212*

ALPHABETICAL LIST OF CROPS WITH BOTANICAL NAME AND CROP CODE (ICC AND CPC) (Continued)

Crop name	Botanical name	ICC 1.1 Code	ICC 1.2 Code	CPC 3.0 Code
Buckwheat	*Fagopyrum esculentum*	1.1	1.1	01192
Cabbage (red, white, Savoy)	*Brassica oleracea var. capitata*	2.01.03	2.01.03	01212*, 01919.90* (fodder)
Cabbage, Chinese	*Brassica chinensis*	2.01.03	2.01.03	01212*
Cacao (cocoa)	*Theobroma cacao*	6.01.04	6.01.04	01640

Sunflower for oil seed	*Helianthus annuus*	4.03.08	4.03.08	01445
Sunhemp	*Crotalaria juncea*	9.02.01.04	9.02.01.04	01922.02*
Swede	*Brassica napus var. napobrassica*	2.03.90	2.03.90	01259*
Swede for fodder	*Brassica napus var. napobrassica*	2.03.90	2.03.90	01919.90*
Sweet lime (see Lime, sweet)				
Sweet pepper (see Pepper, sweet)				
Sweet potato (see Potato, sweet)				
Sweet sorghum (see Sorghum, sweet)				
Tallow tree	*Shorea aptera; S. stenocarpa; Sapium sebiferum; Stillingia sebifera*	4.03.13	4.03.13	01499.04
Tangerine (see Mandarin)				
Tannia	*Xanthosoma sagittifolium*	5.9	5.9	01591*
Taro	*Colocasia esculenta*	5.05	5.05	01550
Tea	*Camellia sinensis*	6.01.02	6.01.02	01620.01, 01620.02, 01930.04
Teff	*Eragrostis abyssinica*	1.9	1.9	01199.01
Thymus	*Thymus vulgaris*	6.02.02.90	6.02.02.90	01699*
Timothy	*Phleum pratense*	9.01.01	9.01.01	01919.90*
Tobacco	*Nicotiana tabacum*	9.06	9.06	01970
Tomato	*Lycopersicon esculentum*	2.02.03	2.02.03	01234
Trefoil	*Lotus spp. (about 100 sp.)*	9.90.01	9.90.01	01919.90*
Triticale	*Hybrid of Triticum aestivum and Secale cereale*	1.09	1.09	01191
Truffles	*Genus tuber*		20.04.02	01272
Tung tree	*Aleurites spp.; Fordii*	4.03.10	4.03.10	01499.02
Turmeric	*Curcuma longa*	6.02.02.90	6.02.02.90	01699*
Turnip	*Brassica rapa*	2.03.02	2.03.02	01251* (edible), 01919.90* (fodder)
Urena (Congo jute)	*Urena lobata*	9.02.01.02	9.02.01.02	01922.02*
Vanilla	*Vanilla planifolia*	6.02.02.06	6.02.02.06	01658

ALPHABETICAL LIST OF CROPS WITH BOTANICAL NAME AND CROP CODE (ICC AND CPC) (Continued)

Crop name	Botanical name	ICC 1.1 Code	ICC 1.2 Code	CPC 3.0 Code
Vetches	*Vicia sativa*	7.1	7.1	01709.01
Walnut	*Juglans spp. (over 20 sp.), ep. regia*	3.06.06	3.06.06	01376
Watermelon	*Citrullus lanatus*	2.05.01	2.05.01	01221
Wheat	*Triticum aestivum*	1.01	1.01	01111*, 01112*
Yam	*Dioscorea spp. (over 120 sp.)*	5.04	5.04	01540
Yautia	*Xanthosoma sagittifolium*	5.06	5.06	01591*
Yerba mate	*Ilex paraguariensis*	6.01.03	6.01.03	01630

NOTE: *Indicates when more than one ICC code is linked to the same CPC code or when one ICC code is linked to more than one CPC code.
